

Walkway Board

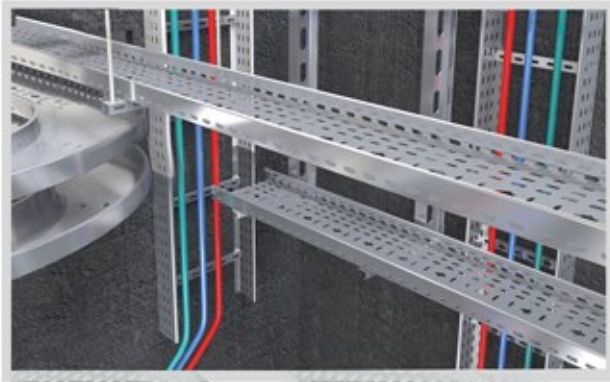

CABLE TRAY

WE ARE EXPERTISE IN SUPPLYING ELECTRICAL AND BUILDING INFRASTRUCTURE ACCESSORIES

cable trays | walkway boards | storage racks | gratings

CABLE TRAYS

Cable Trays are mechanical support systems that provide a rigid structural system for electrical cables, raceways, and insulated conductors used for electric power distribution, control, signal instrumentation and communication.

Cable Trays are essential to a building's electrical system, supporting cables in the same way that roadway bridges support traffic. They provide versatility and offer savings of up to 84 percent in labor costs. Cable Trays are made of GI & Stainless Steel. We manufacture various types of cable trays with different shapes based on customer requirements and few of the them are isted below:

Types of Cable Trays

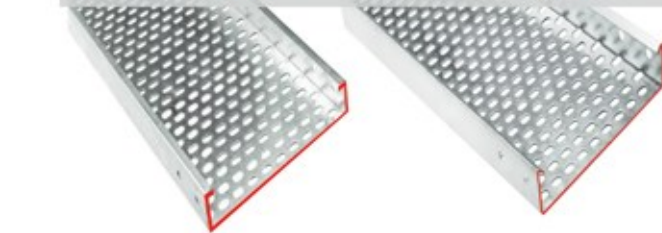

- ◆ G.I & Stainless Steel
- ◆ Hot Dip Galvanized
- ◆ Powder Coated
- ◆ Enamel Painted

Ranges of Cable Trays

- ◆ Perforated Inward Bend (STRAIGHT & INCLINED)
- ◆ Perforated Outward Bend
- ◆ Other Cable Tray Accessories

Technical Spec :

- ◆ Strength : Light, Medium & Heavy Duty
- ◆ Raw Material : Mild Steel, GP Coil
- ◆ Width (W) : 50 mm - 1200 mm
- ◆ Height (H) : 25 mm - 150 mm
- ◆ Thickness : 1.2mm, 1.6mm, 2mm, 2.5mm, 3mm
- ◆ Outward Bend : 12 mm - 25 mm
- ◆ Length : 2440mm / 2500mm / 3000mm
- ◆ Finish - Mild Steel : Hot Dip Galvanizing as per IS 2629 / 2633 / 4759
Painted & Powder Coated

INDUSTRIAL STORAGE RACKS

Globe Engineering offers contemporary racking solutions suitable for multiple storage applications, supported by innovative space management techniques, elegant construction and minimum maintenance requirements.

We manufacture and supply Industrial racking systems that include Heavy Duty Racks and are made from highly graded raw material that ensure the quality as well as performance of systems. Available in different sizes based on customer requirements.

- ◆ Heavy Duty Racks
- ◆ Mild Storage Racks
- ◆ Pallet Racks
- ◆ Material Handling Racks

Warehouse racking, also known as storage or pallet racking is a material handling system suitable for mass storage of goods unitized on skids or pallets. This allows for efficient utilization of space while providing easy access to stockpiled items for better inventory control.

STEEL WALKWAY BOARD

Walkway boards are used for working on the height level platforms. Best suitable for safety purpose. It's antiskid perforated surface provides superior grip in safety terms.

Scaffolding Walkway Planks are made of GI Sheet / SS. It has more strength and strong and it is highly used for building construction, erection works for scaffolding purpose.

- ◆ Walkway Plank
- ◆ Steel Board / Footboard
- ◆ Antiskid Plank
- ◆ Floor Plank

STEEL GRATINGS

Steel Grating, also known as bar grating or metal grating, is an open grid assembly of metal bars, in which the bearing bars, running in one direction, are spaced by rigid attachment to cross bars running perpendicular to them or by bent connecting bars extending between them, which is designed to hold heavy loads with minimal weight.

It is widely used as floors, mezzanines, stair treads, fencing, trench covers and maintenance platforms in factories, workshops, motor rooms, trolley channels, heavy loading areas, heavy equipment etc.,

- ◆ Bar Gratings
- ◆ Grating Floors
- ◆ Electro Forged Gratings
